

Mobile Coach Quick Start Guide

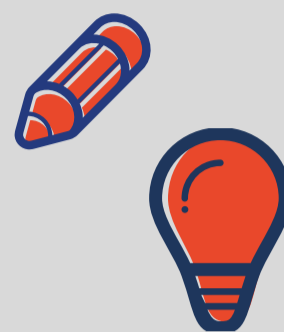

Ready to get started setting up your Mobile Coach app? Use these suggested steps to get started! However, you can always go out of order to best fit your organization's flow. If you get stuck at any spot, click on the step to jump to the "How-To Guide" for more details and an instructional video.

Wire Frame

What are the main buckets you are organizing your content in?

Whiteboard or draw out the wire frame of what you want your membership to look like.

STEP 01

STEP 02

Home Page

How do you want your users to log in? And will their devices be set up as a different preferred language than English?

Make sure your organization is set up correctly. This includes your organization name, logo, user registration, access, and locale variants.

Tags

What are the main themes of the content you will be uploading?

Create the list of tags you will use to organize your content.

STEP 03

STEP 04

Content

What assets can be connected to your pieces of content?

Think smarter, not harder when uploading your content. You can have one piece of content with two assets attached. (i.e. a video of a drill and an article explaining the drill).

Pages

What is going to be the simplest way to organize your content so it is user friendly?

Create the pages that you will organize the content into. Since you already have the content uploaded, you can add content as you create the pages.

STEP 05
